## WORK EXPERIENCE

Techno Soft Solution (Junior React Developer)

Feb 2024 - Aug 2024

Developed responsive, interactive UIs using React.js, Material-UI, and Tailwind CSS, creating clean, reusable components and maintaining consistency across projects. Collaborated with backend and design teams to integrate APIs, manage state, and handle routing for seamless end-to-end frontend solutions. Actively contributed to agile sprints, code reviews, and UI/UX improvements, enhancing overall performance, usability, and product quality.

Fabulous Technology Solutions ( Full Stack Developer )

Sep 2024 - Present

Collaborated with cross-functional teams to design and develop software products addressing real-world needs, building RESTful APIs using Express.js and Node.js for smooth data integration. Implemented secure authentication and authorization with JWT, OAuth, and bcrypt, and utilized Context API and Redux for efficient state management across large-scale applications. Developed reusable utility functions and custom React hooks for scalability while working closely with UI/UX designers to translate wireframes into pixel-perfect, interactive interfaces.

## PROJECTS

---

### The Tax Truths – Tax Advisory & Management Platform

- Developed multiple dashboards: Admin, Client, Super Admin, and Operations, each tailored with relevant toolBuilt a responsive, intuitive frontend using React.js, Material-UI, and Tailwind CSS for smooth navigation across dashboards.s, workflows, and data visibility.
- Designed secure client interfaces for managing tax filings, payments, financial reports, and document uploads.
- Enabled collaboration features through seamless document sharing and real-time updates between clients and advisors.
- Implemented efficient workflow designs for admins and operations to monitor activities, manage payments, and oversee tax compliance tasks.

### ApoTek – Laboratory Management System

- Built role-based dashboards and panels for Admin, Lab Admin, Sales, Logistics, Customer Service, and Clients.
- Developed interactive and responsive UIs using React.js, Material-UI, and Tailwind CSS for smooth workflows.
- Implemented client profile management with secure access to lab records, orders, and communications.
- Enabled real-time updates and notifications across dashboards for lab reports, orders, and tasks.
- Designed frontend to support efficient multi-role interactions and seamless user experience.

### Kordia – Musical Academy

- Built a responsive, interactive UI connecting musicians, students, and event organizers
- Developed student-facing modules for browsing, enrolling, and accessing courses.
- Created musician dashboards to manage courses, events, and performances.
- Enabled real-time updates and notifications for course progress, events, and bookings.
- Implemented a real-time chat system to facilitate communication between students, musicians, and organizers.

### RHS – School Management System

- Designed interactive dashboards and a responsive UI for managing students, guardians, and staff.Developed student-facing modules for browsing, enrolling, and accessing courses.
- Built student profiles to track academic progress, attendance, grades, and behavior.Enabled real-time updates and notifications for course progress, events, and bookings.
- Designed staff management modules for teachers and admin to handle classes, schedules, and reports.
- Implemented frontend using React.js, Material-UI, and Tailwind CSS for smooth navigation and user experience
